

Member Profile

Linda Horn

I lost this airplane due to a strong wind gust in February 2009, but it's still my favorite plane.

Private

What ratings to you hold?

Aircraft Single Engine Land

Flight Hours

835 (no longer flying due to lost medical)

Do you own an airplane?

No. I did have a 1966 Piper Cherokee 140 that had several modifications for flying at these altitudes.

Why did you start flying?

Because my ex-husband decided to learn to fly. I started out just planning on learning to run the radios, do navigation and land if necessary, but found out I really enjoyed flying and so went on and got my license. Then of course, I kept the airplane when we got divorced.

Tell us about your favorite flying adventure

I think being able to fly to the International 99 conferences whenever possible is great. Especially enjoyed the trip to Calgary in Canada.

Why did you join the 99s?

I felt like I needed the help and support of other women aviators. And once I got started, I just couldn't stop. The 99s have been a major part of my life ever since I joined.

What is your favorite 99s event or activity?

Going to section and international meetings. They are a wonderful way to meet lots of other women pilots who soon become great friends.
